# Email Marketing Services

## Email Append

Add email addresses to your customer database & prospect databases. Enhance your direct mail list with consumer or business executive emails to accelerate your email marketing. emailUSA.com's email append attaches business and consumer email addresses to postal records, keeping you in touch with direct mail subscribers.

## Email Reverse Append & Enhancement

Match names and addresses to 35-50% of your email list. With reverse email append, you'll be able to segment your email customers by location and market to them via direct mail. Target and reach customers with personalized messages when you have a name, age, income, home value, and lifestyle information. Find alternate points of contact, including postal and social media. To learn more, call us today!

## Email Hygiene

As the name suggests, email hygiene entails keeping a clean email list. It means that all the addresses comprising the list is valid, active and does not bounce out any email communication coming from you.

Email hygiene determines your online reputation, which, in turn, determines your deliverability rates. A good list means that you minimize email bounces, which ISPs frown upon because they equate bouncing mails to spam. If you send out emails that bounce too many times, ISPs are likely to put you on their black list and completely block out all of your emails to their subscribers.

The last thing you want as an email marketer is to have a tainted online reputation. This gets in the way of communicating with your customers; it gets in the way of email marketing success.
