Reach Executives and Professionals at Work or Home

DatabaseUSA has, for many years, provided contact information for decision makers at businesses across the U.S. As an original compiler of business data, we make it our business to get the right contacts and titles to enable your business to grow.

Now, DatabaseUSA has linked our U.S. Consumer File to our U.S. Business Database, to give insight to an executive's residential information.

With this linkage, here are just a few of the data pieces you will know.

- Home address
- Presence of children
- Interests and hobbies
- Estimated household income

Imagine what you could do with additional insights. Send a message that touches an interest point or hobby. Deploy direct mail to a home address away from the office clutter. Your creativity is the only limit!

How does this work?

Matching an individual at their work location with their residential information is no simple task. DatabaseUSA data scientists spent years perfecting algorithms which optimize the search accuracy. Among the many factors considered are distance, age, occupation, income, and much more. For some individuals, the home address is the work address. In some cases, there is only one match in a commuting distance. In a few situations, the most likely match is taken from among several possible candidates. We provide you not just the matched individual, but also a confidence score.

What are the numbers?

Approximately 30 million executives have been matched to our DatabaseUSA Consumer File.

Customized Sales Leads - By Using Artificial Intelligence

The latest in cutting-edge technology that will analyze your customers and give you the most valid sales leads to fit your needs!

How Does Artificial Intelligence Analysis Work?

We take your customer database and our Data Scientists employ their Artificial Intelligence robots to identify the demographic and psychographic traits of your customers, such as: number of employees, sales volume, SIC code for businesses and age, income or home value for consumers.

Then our Artificial Intelligence robots analyze the results and assign a value rating to each trait for each individual record. These values are then used to identify high-level “matches” within our database that will help create a unique, Custom Sales Leads database for you to market to and grow your sales.

How Does Utilizing Artificial Intelligence Help You to Grow Your Sales?

Our Data Scientists can also employ their AI robots to evaluate your current customer base’s sales history and apply dynamic micro-segmentation methods on your new Custom Sales Lead database to segment your sales leads into high, medium and low potential accounts. This helps you decide how and how much marketing dollars to spend on these new sales leads.

For Example:

- High Potential accounts deserve more specialized attention such as personal phone calls, high-impact promotional gifts and one-to-one sales calls and meetings.
- Medium Potential accounts may receive personal letters or direct mail pieces with a follow-up phone call.
- A simple, low-cost email campaign can be used for Low Potential accounts.

Bottom Line – Our Artificial Intelligence technology allows you to identify a database of Custom Sales Leads that can help Grow Your Sales.

There is simply nothing out there like this!
